- ✓ produced in Europe

# GREEN ELECTRICITY FOR EVERYONE!

ENERGY FOR LIFE

- ✓ starting October 2023
- ✓ automatic
- ✓ at no extra charge

TOGETHER ON SITE! 

WEVG Salzgitter GmbH & Co. KG is rooted in Salzgitter. We are on site and know the city and its people. We identify with our city. We do not merely sell electricity, natural gas, heat and drinking water – we advise our private and business customers and are always at their side when it comes to economic energy solutions.

To all households in Salzgitter

## Energy with a future – Salzgitter becomes a city of green electricity

TOGETHER  
ON SITE!

*We have news for you: As of 1st October 2023, we will be converting our electricity portfolio to 100 % green electricity. All WEVG customers will therefore receive energy from wind, solar and hydropower in the future. This applies to both private households and commercial enterprises.*

*Best of all: Your electricity tariff remains unchanged – you will not pay an extra charge for green electricity! The conversion of our electricity supplies will take place automatically, which means that you do not have to do anything.*

**Why are we doing this?** *By switching to renewable energies, we will not only save up to 56,000 tonnes of carbon dioxide a year together with you, but will also make an important contribution to achieving climate protection goals.*

*By the way: Our green electricity product is tested and certified annually by the TÜV. Statutory proofs of origin also show how and where the electricity was generated from renewable energy sources.*

*We look forward to the energy transition in Salzgitter!  
Your WEVG Salzgitter*

## FACTS ABOUT GREEN ELECTRICITY

### What is green electricity?

Our green electricity is generated from renewable energy sources and comes 100 % from European wind, solar and hydropower plants.

### Is there any difference in performance between green electricity and conventionally generated electricity?

No – with green electricity, technical devices will continue to work just as well as usual.

### How do you guarantee that I really am supplied with green electricity?

To ensure that the electricity really is green electricity, there is a proof of origin register from the Federal Environment Agency, which is managed according to legal requirements. Therein is noted how and where the electricity was generated.

## Any questions?

WEVG's team of customer advisors will be happy to assist you.
